

Model #SGAR-SLS:

SnoGuard™ with Slotted Strap for Miscellaneous Retrofit

This unobtrusive, medium height SnoGuard is stronger than others brands, will not fold over and is the original traditional look going back over 78 years.

- Made of 24 oz. cold rolled copper.
- Includes two vertical pedestals of double 24 oz. copper for strength making it the most stable / strongest snow guard on the market.
- Flat copper base allows unit to hug close to slate.
- Flat copper strap allows slate or other roofing material to lay flatter.
- For retrofit.
- Available in lead coated copper (special order)
- Custom sizes are available for wood shakes (longer), etc.
