**Type SGPM** - for snow retention

Gough **SnoGuard**<sup>™</sup> for Painted Metal, Slate, Shingle & Wood Shake Roofs

TYPICAL SIZES INDICATED ARE (+/-) 1/16" (1.6MM)

A = 6 3/8" B = 5" C = 1 1/4" D = 1" E = 3 1/4"

- Made of painted non-rusting metal to match colors
- Includes two vertical pedestals each of double Kynar painted metal for strength, making it the most stable & strongest snow guard on the market
- Flat base allows unit to hug close to roofing material and wide to distribute weight
- Holding surface is almost 50% greater than others - helps retain more snow with each snow guard
- For new construction or adaptable for retrofit
- Also available in copper
- May be customized for different roofing materials and dimensions
- Secure with Sure Bond 190, requires 50 degrees Fahrenheit to cure
